

FineTuning to generate Java selenium using Project Specific code from given DOM

I was able to get the project specific methods even after finetuning with examples with project specific methods from finetuned model, after checking with chatgpt what all reasons could be, one of the reasons possible was the prompt/instructions, so added specific instructions to use project specific methods and tried.

- 1) Chrome extension prompt updated

2) Added CreateLead example added for examples for finetuning, that was created and converted to JSONL.

The screenshot displays an IDE interface with two windows. The top window, titled 'ai-extension_v2', shows a file explorer on the left with a 'TRAINING' folder containing several .txt files and three .jsonl files. The 'CreateLeadPage.txt' file is selected. The main editor area shows the content of 'CreateLeadPage.txt', which is a Selenium test script. The script is divided into two sections: HTML and JAVA. The HTML section defines the page structure with input fields for 'companyName', 'firstName', and 'lastName', and a 'submitButton'. The JAVA section defines the 'CreateLeadPage' class, which extends 'ProjectSpecificMethods'. It includes two methods: 'enterCompanyName' and 'clickCreateSubmit'. A red arrow points to the 'companyName' input field in the HTML, and another red arrow points to the 'enterCompanyName' method in the JAVA code.

```
1 ===HTML===
2
3 <input type="text" class="inputBox" name="companyName" size="30" maxlength="100" id="createLeadForm_companyName">
4 <input type="text" class="inputBox" name="firstName" size="30" maxlength="100" id="createLeadForm_firstName">
5 <input type="text" class="inputBox" name="lastName" size="30" maxlength="100" id="createLeadForm_lastName">
6 <input type="submit" class="smallSubmit" name="submitButton" value="Create Lead" id="ext-gen652">
7
8 ===JAVA===
9
10 package com.leaf taps.pages;
11
12 import com.framework.selenium.api.design.Locators;
13 import com.framework.testng.api.base.ProjectSpecificMethods;
14
15 /**
16  * Page object representing the Create Lead page.
17  * Provides methods to enter lead details and submit changes.
18  * @author Auto-generated
19  */
20 public class CreateLeadPage extends ProjectSpecificMethods {
21
22     /**
23      * Enters the company name in the Create Lead form.
24      * @param crtcomnyName The company name for company lead being created
25      * @return The current CreateLeadPage instance
26      */
27     public CreateLeadPage enterCompanyName(String crtcomnyName) {
28         clearAndType(locateElement(Locators.ID,"createLeadForm_companyName"), crtcomnyName);
29         reportStep(crtcomnyName +"Company name is entered successfully ", "pass");
30         return this;
31     }
32
33     /**
34      * Clicks the Create Lead button to submit the changes.
35      * @return A new ViewLeadPage instance
36      */
37     public ViewLeadPage clickCreateSubmit() {
38         click(locateElement(Locators.CLASS_NAME,"smallSubmit"));
39         return new ViewLeadPage();
40     }
41 }
```

3) Created finetuned model

The screenshot shows the Testleaf Fine-tuning dashboard. The left sidebar contains a menu with options: Usage, Cost, API Keys, Fine-tuning (selected), Storage, Test Case Generator, Playwright Converter, Settings, and Profile. The main content area is titled 'Fine-tuning' with the subtitle 'Train and manage custom models'. It features four summary cards: 3 TOTAL JOBS, 3 SUCCEEDED, 0 FAILED, and 115,492 TRAINED TOKENS. Below these is a table of fine-tuning jobs. The table has columns: FINE-TUNE ID, BASE MODEL, METHOD, STATUS, TRAINED TOKENS, and CREATED. Three jobs are listed, all with a status of 'Succeeded'. The first two jobs have a red underline. The bottom of the dashboard shows a pagination bar indicating '1-3 of 3' items and '10 / page'.

FINE-TUNE ID	BASE MODEL	METHOD	STATUS	TRAINED TOKENS	CREATED
ft:gpt-4o-mini-2024-07-18:testleaf-2::DjOkk...	gpt-4o-mini-2024-07-18	supervised	Succeeded	47,088	25 May 2026 17:56
ft:gpt-4o-mini-2024-07-18:testleaf-2::Dj58n...	gpt-4o-mini-2024-07-18	supervised	Succeeded	47,088	24 May 2026 20:54
ft:gpt-4o-mini-2024-07-18:testleaf-2::DigQE...	gpt-4o-mini-2024-07-18	supervised	Succeeded	21,316	23 May 2026 18:35

4) Used the finetuned model into AI extension
