

Please view screen shots for the application for both 1 and 2 together after the prompts.

1) User story -tests generator --with vibe coding implement the Jira integration to fetch user stories (both frontend and backend)

Prompt:

Read my entire workspace and understand how UI implemented in the frontend folder.

I want to add "Connect Jira" button to establish the connection(Base url

Email id,Jira API key_)

once the jira is connected userstories should be populated in the UI screen in a drop down list box, from which one can be selected and whose details will get populated into the existing fields on UI below this button like

Story Title

Description

Acceptance Criteria

Rest would remain same like clicking on "generate" will send API call to backend to get response.

use following parameters for JIRA API to fetch all stories under the project.

project = VIN

add JIRA email ID, API Key, base URL from .env under root folder, where i can specify these values

STRICTLY] DO THE IMPLEMENTATION ONLY ON UI

2) Application is User story -tests generator, Add a button option to Generate Feature file for the user stories

Prompt:

Read my entire workspace and understand how extension is implemented in terms of the User Interface, prompt creation by assembling to send to the selected LLM provider.

Further add another button besides "generate" say "generate feature file" to actually generate Cucumber gherkin

language feature file for the test cases that were generated in previous step.

Show the output in a separate text area in a new tab, that can be selected to switch between generated test cases and the feature file code.

Test Cases

Feature File

```
Feature: Doctor Activities Raise Request

Scenario: Successfully raise a doctor activity request with all mandatory fields
  Given I am logged in as a Doctor
  And I navigate to the "Raise Request" page
  When I enter patient ID "12345"
  And I select request type "Lab Test"
  And I enter description "Blood work for cholesterol"
  And I set request date to "2024-06-15"
  And I submit the request
  Then the request is created successfully
  And I see the confirmation message "Request submitted successfully"
  And a request ID is generated

Scenario: Raise a request leaving optional fields blank
  Given I am logged in as a Doctor
  And I navigate to the "Raise Request" page
  When I enter patient ID "12345"
  And I select request type "Lab Test"
  And I leave optional notes empty
  And I submit the request
  Then the request is created successfully
  And I see the confirmation message
```
